

Earthquake-Friendly Enclosures

Optima EPS (Fremont, CA) has announced a new cabinet enclosure for mobile applications or seismic zones. The Mobile cabinet features double-walled extrusions for a rugged, modular design, and is placed on an isolator platform for additional protection while mobile. All of the M-series cabinets also feature reinforced corner members, cross-bracing, and stiffeners to handle rugged applications. Other features include:

- Acceptance under MIL-STD-810F for shock and vibration.
- An enclosure that is designed to withstand an earthquake Seismic Zone 4 even as defined in GR-63-CORE without displaying any permanent deformation that might impair performance.
- Advanced EMC shielding.
