

Keep Your Rollers Organized

The Proofer Storage Stand from the **Paul N. Gardner Co., Inc.** (Pompano Beach, FL) safely stores six proofer rollers and the proofer assembly. The rollers are suspended by their journals to protect the engraved surface area, and rollers with wide or narrow hubs can also be stored. According to the company, the proofer assembly is stored with the handle down and is safely supported on a rubber grommet. Storing the proofer assembly with the rubber roller straight up helps eliminate the concern of creating a flat spot by lying the rubber roller on a work bench. In addition, the stand is made of corrosion-resistant stainless steel.
