

Two-In-One Grooves

The Combo Roll Groovers from **Reed Manufacturing Company** (Erie, PA) are now available in a new model for larger pipe, the RGCOMBO812, which forms standard rolled grooves in 8" to 12" steel, stainless steel, and aluminum. The two-in-one tool yields cost savings by allowing a complete change in minutes from power machine operation to manual work, according to the company. In addition, the tool is lightweight and designed for portability, making it an economical solution for the grooving requirements of mechanical piping system installations.
