

All-In-One Vehicle Tracking

The PowerFleet wireless vehicle management system from **I.D. Systems** helps increase productivity and safety, optimize vehicle use, create visibility of vehicles, and reduce damage to facilities. The system incorporates many functionality modules, including:

- Vehicle access control, which creates accountability by restricting vehicle use to authorized operators.
- Motion/idle detection, load sensing, travel distance monitoring, peak utilization, and more.
- Real-time vehicle location tracking plus other directed-work, productivity, and visibility tools.
- Vehicle health data collection, battery management, automated lock-out/tag-out, in addition to other analysis tools.
