

Cloud-Based ERP

Epicor Manufacturing Express Edition is a software suite for job shops and small manufacturers provided through a software-as-a-service (SaaS) model. The software is designed to help customers reduce complexity and decrease ongoing operational costs, enabling them to focus on business, not IT. Manufacturers are provided everything they need to manage opportunities, orders, and operations in one integrated solution. The Express version offers financial and operational benefits, including lower entry costs, shorter deployment, global availability, and seamless integration.
