

Lighter, Faster AS/RS

The Mustang Evo is **TGW**'s single-mast automated storage and retrieval system (AS/RS), and it offers a payload of 220 pounds and an optimum height of 39', meaning it can meet the requirements of more than 70 percent of all mini-load AS/RS solutions. A new construction makes the new Mustang Evo 25 percent lighter, yet the mast is three times stiffer. According to the company, these improvements allow users to push the Mustang Evolution to maximum speeds of 19.7 ft/s.
