Protect Your Cables

Yellow Jacket Inc. has developed the BarrierFree WASP AMS cable protector, which eliminates rails, barriers, and drop-offs for smooth transitions with tapered ramps for ease of access or crossing. The system can be used with Yellow Jacket's Hipernsap locking devices, which ensure a secure connection. The WASP AMS system meets ADA requirements according to the 28 CFG and allows access from a wide variety of approaches, permitting full expandability for multi-directional use.
