

Safe, Bright Work Lights

General Mfg., Inc. has launched its IS300 Intrinsically Safe, Cordless LED work light. The IS300 comes with three 3-watt LEDs and has the capability of operating in beam mode for use as an inspection light. The long-life LEDs are rated at 50,000 hours and produce 5,000K bright, white light. The high-output LEDs allow the user to replace incandescent and fluorescent light with a single product. A red LED in the light handle indicates a low battery charge, and cut-off circuitry inside the battery prevents damage from drawing the charge down too far.
