

## Safe Transfer Of Flammable Liquids

**GoatThroat** introduces the SCP-6500 series of groundable, hand-operated pumps for Class 1 and 2 flammable liquids. The pumps exceed the criteria of NFPA 77 while eliminating fugitive emissions and allowing for the spill-free transfer of flammable liquids from 5 to 55 gallon containers. According to the company, the SCP-6500 will allow facilities to safely transfer flammable liquids without the use of expensive electric pumps. They come complete with a 6' grounding wire, and offer a life expectancy of 10 to 15 years while providing safe transfer of 900 fluids and solvents.
