

## Slip-Resistant Roofs

**Kee Safety, Inc.** (Buffalo, NY) has developed the Kee Walk, a slip-resistant walkway for workers accessing a roof during maintenance. The walkway provides a clear demarcation route that protects the roof from damage by distributing the load across its surface, and is compatible with roofs from 0 to 35°, according to the company. The systems are assembled with lightweight aluminum bearer bars and high-grade nylon treads that feature a raised, rough surface for enhanced slip resistance in adverse weather conditions. In addition to the Kee Walk, the company offers a line of personal protection equipment (PPE), including fall protection devices, harnesses, safety helmets, and more.
