

# Better Avoidance Detection

**Omron Scientific Technologies Inc.** (Fremont, CA) introduces its compact Type 3 safety laser scanner — the OS32C Safety Laser Scanner — with a 104.5mm profile and low 5W power consumption. According to the company, the OS32C is easy to install, making it ideal for solving presence detection and collision avoidance applications. Important features of the OS32C include:

- System monitoring over LAN.
- Low profile equipment designs thanks to the small footprint, and a very low power consumption.
- A 270° degree detection angle that enables a single scanner to provide presence detection.
- A simplified I/O wiring method that requires fewer inputs to configure multiple zones when compared with other safety laser scanners.
