

A Better Piston Gauge

Fluke Calibration (Everett, WA) has introduced the PG9607 piston gauge, which delivers unequalled performance for the measurement of absolute and gauge pressures up to 500 kPa (72.5 psi). The PG9607 piston gauge has a 100g mass load to allow a wide range of pressure defined by a single piston-cylinder assembly, and a new 50mm piston-cylinder design. In addition, the product uses DH Instruments AMH automatic mass handling technology to allow fully unattended testing.
