'Hybrid' Carts

Geerpres, Inc. (Muskegon, MI) has introduced a new high-capacity, powder-coated cart that blends the most beneficial features of stainless steel and modular plastic carts. The "Hybrid" High-Capacity Cart features a powder-coated metal construction and a center divided cabinet that includes locking and non-locking compartments. The 8.4 cubic feet of storage is built-in with a compact manner, so the actual "footprint" of the cart is small. Double bearing 5" swivel casters are included for maneuverability, and front roller bumpers protect walls, equipment, and furnishings.
