

Water-Proof Cabling

Heyco Products, Inc. (Minotola, NJ) now offers the Right Angle Strain Relief Cord Grips, which bend electrical cable without damage after insertion, an assembly method that saves time and money, according to the company. The design provides liquid-tight integrity even in the open position, and acme threads on the body prevent skipping and speed installation. The grips are available in PG, NPT, and metric threads, and all feature a nylon construction that resists salt water, weak acids, gasoline, alcohol, oil, grease, and common solvents.
