

More Durable Polyester Labels

The CILS-8200/9200 metalized polyester labels from **Computer Imprintable Label Systems** (CILS — Burlington, MA) provides durability and resistance against harsh industrial conditions, such as abrasion, oils, grease, extreme temperatures (-196° to 388°C), chemicals, and severe weathering. Variable data can be printed “in-house” and “on-demand” using an existing PC and office laser or thermal transfer printer. In addition, the labels are available in a wide range of adhesives to permanently adhere to all surfaces, including ABS plastics, powder-coated surfaces, cast aluminum, oily surfaces, and more.
