

An In-Plant 'Tiiger'

The universal dolly, designed to carry both pad- and pole-mounted transformers, from **Tiiger, Inc.** (Mt. Juliet, TN) uses a unique three-wheel design to provide a stable load platform that can be easily repositioned for loading and unloading. The high-yield steel construction and low-pressure turf tires allow the system to carry transformers up to 1,000 pounds. The dolly itself weights 210 pounds, and features a standard trailer hub with sealed bearings for easier mobility.
