

## Sump Pump With Propane

**CECOR** (Verona, WI) offers a small propane-powered sump cleaner (model SP50-175PL6), which delivers powerful pumping without electric outlets or air drops. A high suction lift removes coolant, chips, and sludge from the sump, forcing them through a filter that separates solids from the coolant. The coolant can be returned to the machine tool or transported for batch processing. Other features include:

- A twenty-horsepower propane engine.
- A positive displacement pump that generates suction to 13" Hg with a pumping rate up to 110 gpm.
- An efficient overhead cam and valve design, and pressure lubrication to provide maximum power and torque.
- An electronic ignition.
