

Inclinometers For Many Purposes

The Fredericks Company (Huntingdon Valley, PA) has announced the release of its new Dual Axis Inclinometer with 0-5 V analog outputs (X and Y axes) for PWM and temperature. The new inclinometer is designed for all types of instrumentation and equipment, with an angle range of $\pm 60^\circ$ over the X and Y axis, 0.2 arc minutes resolution, and ± 0.1 degrees of repeatability. The inclinometer's compact, high-impact plastic housing provides environmental durability (-40°C to 85°C) in demanding applications. According to the company, the system is ideal for aerial lift platforms, alarm system activation, machine tool leveling, and more.
