

## Choose The Right Steam Tools

**Spirax Sarco, Inc.** (Blythewood, SC) has developed a free application to assist customers in identifying the right steam tools for the job. The Steam Tools iPhone app enables quick access to the company's Steam Tables and a Saturated Steam Pipe Sizing Tool. The tables cover the thermodynamic data for water/stream — users simply need to enter a pressure or temperature into the app, which returns the corresponding pressure or temperature, sensible heat, latent heat, total heat, or specific volume. The pipe sizing tool, on the other hand, helps users in sizing a pipeline.

To find the app, search for “steam tools” in the App Store, or visit [www.spirax.com](http://www.spirax.com) [1].
