

Safer, More Comfortable Harnesses

Capital Safety (Red Wing, MN) has launched the latest product in its Delta harness line from DBI-SALA, which provides premium comfort and ease of use. The newest full-body harness has an improved ergonomic fit, lighter-weight buckles, and high-strength webbing. The harness also uses a No-Tangle triangle pattern, which creates a frame that allows the harness to easily fall into place when worn, and maintains an ideal spacing of shoulder straps to eliminate rubbing and chafing. Other features include:

- A 420-pound capacity, plus a breathable interior and a comfort hip pad to help support the back and hips.
- Durable Tech-Lite Quick Connect Buckles, which are made of an alloy aluminum material.
- Revolver Torso Adjusters, which allows for quick adjustments and the elimination of loose ends.
