

Big Impact, Small Package

Chicago Pneumatic (Rock Hill, SC) has developed the lightweight CP7739 ½” impact wrench, which features side-to-side (S2S Technology) forward/reverse functionality located directly above the trigger. The wrench can deliver 450 ft. lbs. of torque in a compact magnesium composite design that is only 2.78 pounds and 6.4” in length. The S2S technology allows operators to change between forward and reverse with one hand, in any position, which makes the tool ideal for work in hard-to-reach places. In addition, the twin hammer clutch ensures long-term durability, plus a full-tease trigger for control.

Head on over to www.cp.com [1] to get more details on the impact wrench.
