

Easier 'All-In-One' Water Handling

The Holley Transfer Pipe from **Kochek Company** (Putnam, CT) can efficiently move water from dump tanks to drafting tanks, replacing lower volume, more complicated, and labor-intensive methods of transferring water. The “all-in-one” system requires no assembly, with an integrated intake hole, a jet siphon port, a support bracket, and a handle for easy transport. The 6061-T6 lightweight powercoated aluminum is available in 6” and 8” diameters, both 78” in length. The 6” version provides 800-1,400 GPM, and the 8” version offers 1,400-1,700 GPM.
