

Abrasive Blasting Gets Your Plant Clean

Mole-Master Services Corporation (Marietta, OH) now provides abrasive blasting as an environmentally friendly, cost-effective alternative for cleaning food processing bins and silos. The abrasive blasting services are ideal for removing a variety of materials, including paint, surface rust, scale, graffiti, corrosion, and contaminants. The blasting blends sodium bicarbonate with compressed air to scour away unwanted materials without damaging the surface underneath. According to the company, this blasting is an important factor in keeping facilities running at peak capacity. The process can clean machinery, structural steel, masonry, walls, and conveyors.
