

## A Better Way To Sump

The CB6 walk/ride base, from **Cecor** (Verona, WI), combines a sump cleaner with powered transport for long hauls between collection and disposal or treatment. The base can maneuver easily through narrow aisles, around tight corners, and provides work positioning. Operators can also walk and maneuver the sump cleaner into tight areas. Other features include:

- A high suction lift to remove all coolant, chips, and sludge in the sump within minutes.
- A filter that separates solids from the coolant.
- Operation based on a 36-volt battery.
