Find Any Hydraulic Leaks

Spectronics Corporation (Westbury, NY) has introduced the OPK-341 Industrial Leak Detection Kit, an effective and efficient way to pinpoint the exact source of fluid leaks in hydraulic equipment, compressors, engines, and gearboxes. The OPTIMAX 3000 is a cordless, rechargeable blue light LED inspection flashlight. It is 15 times brighter than regular LED flashlights, according to the company. Also included are two 16 oz. bottles of OIL-GLO 44 concentrated fluorescent oil dye, which is compatible with all synthetic and petroleum-based units.

Visit www.spectroline.com [1] to find more details on the whole kit.
