

## **This Membrane Dryer Is A 'SuperStar'**

**LA-MAN Corporation** (Mazeppa, MN) is now offering the AMD-035 SuperStar Membrane Dryer that provides clean and dry compressed air. The membrane dryer can be used where refrigerated dryers may be too large. The AMD-035 lowers the dew point by continuously removing water vapor and venting into the surrounding atmosphere. Other features include:

- The ability to reduce dew point temperatures to 20°F, making it a solution for spray booth applications.
- A pre-filtration system that incorporates a high-efficiency coalescing filter into the process.
- A standard automatic float drain, which allows for the discharge of moisture from the Extractor/Dryer while preventing any system air loss.
