

Miniscule Proximity Sensors

AutomationDirect (Cumming, GA) has extended its offering of industrial sensors to include the PEW series of stainless steel DC proximity sensors. The sensors are flush-mountable and feature a 2mm sensing range. They are available with either M8 or M12 quick disconnects, and have LED status indicators, which are visible and wide angles. In addition, the LF40 series rectangular inductive DC proximity sensors have either 20mm or 35mm sensing ranges.
