

Smarter Gas Handling

Gasco Affiliates, LLC (Oldsmar, FL) has announced the expansion of its EcoSmart line of environmentally-friendly precision gas products with the EcoSmart 44, a standard 34-liter container containing 44 liters of precision calibration gas. The new model features 29 percent more gas than the traditional 34-liter unit, which reduces the cost per liter while extending the life cycle. The reinforced aluminum alloy cylinder is made with a proprietary manufacturing process to safely and effectively increase the gas pressure. In addition, the EcoSmart is refillable, making it more environmentally-friendly.
