

## Even, Precise Bolt Tensioning

The hydraulic bolt tensioners from **Enerpac** (Sydney, Australia) help facilitate faster, safer, and more precise maintenance and fabrication operations, according to the company. The GT-Series bolt tensioners, in capacities up to 320 tons at 1,500 bar, are suited where operators want to achieve known and accurate bolt loads across multiple applications. The precise and time-saving fastening technology is useful in applications involving critical tolerances. Other benefits include:

- The ability to “daisy chain” the tensioners for even pressures across a bolted surface.
- A detachable and rotational bridge that simplifies tool positioning.
- An anti-slip grip for more secure handling.
