

Longer-Lasting Tool Grades

The Beyond platform of high-performance tool grades from **Kennametal** (Latrobe, PA) is now available in inserts for the company's FixPerfect system, which promises improved toughness and wear-resistance, resulting in higher turning productivity and safety. The FixPerfect system features a proprietary shaped pocket for high clamping forces, very low cutting forces, chip control, and an improved process stability. Productivity can be increased because the FixPerfect pin simply needs to be loosened — not removed — to index the insert.

Visit www.kennametal.com [1] to get more information on the FixPerfect system.
