

Scissor Lifts Reach New Heights

Genie (Redmond, WA), a Terex brand, is launching a new series of 69"-wide rough terrain scissor lifts, which includes three new models: GS™-2669 RT, GS™-3369 RT and GS™-4069 RT. According to the company, the redesign has increased capacity and improved jobsite performance. The 4069 model has a 40' full drive-height, while the other two models can reach 26' and 33', respectively. An increased platform work space of 13 percent gives users more room to get their jobs done. Lifting capacity has increased in the 2669 model by 20 percent, from 1,250 to 1,500 pounds. The 3369 RT has a lifting capacity of 1,000 pounds, and the 4069 RT can lift 800 pounds.
