

A Better Heat Treating Sheet

Precision Brand Products (Downers Grove, IL) has introduced its 12" x 24" type 321 Heat Treating Sheets, which the company says is a more economical alternative to the standard tool wrap rolls. The sheet design keeps handling to a minimum and can accommodate a majority of parts, which means less risk of being cut. The sheets are packaged for easy handling and storage, allowing for easy access to each individual sheet. They come in 10- 20- or 30-sheet packages.
