

## Faster Heating With Steam

**Kadant Johnson Inc.** (Tree Rivers, MI) offers direct injection steam heaters to provide a cost-effective way to accurately heat water and water-based slurries by injecting steam directly into the fluid. In addition, they can handle a wide range of flow rates, allowing for precise temperature control while conserving energy. Features and benefits of the system include:

- The ability to create instant hot water, or other fluids.
- A large turn-down ration, low vibration, and a low noise level.
- Enhanced process flexibility and low maintenance costs.
