

Forklifts Get Articulate

Combilift (Greensboro, NC) has introduced new designs and a new 33E model in the Aisle-Master range of articulated forklifts. By replacing a combination of reach and counterbalance trucks with a very narrow aisle operating Aisle-Master, storage capacity can be doubled, according to the company. The 33E has a 3,300-pound capacity even while working in tighter aisles. Features include:

- 775 Amp hour and 930 Amp hour capacity batteries with an AC traction motor (19.5 kW).
- A robust chassis construction and an ergonomically-designed operator's cab.
- An integral side shift fitted as standard.
