

More Ergonomic Vacuum Lifting

An updated VT Series ergonomic vacuum lifter from **Anver Corp.** (Hudson, MA) has a stronger and more secure handlebar, plus a proprietary lifting tube and tube attachment system. The Anver VT Tube Lifter features a handlebar that secures at six points (front, center, and rear) for rigidity, and is fully adjustable to let operators tailor it to their own requirements. The lifting tube is also 15 percent lighter than previous versions, is more compressible, and has easy screw-on connectors. The lifters have capacities up to 650 pounds.
