

Replace Those Incandescent Dock Lights

Phoenix Products Company, Inc. (Milwaukee, WI) is now selling the Phoenix FLEX LED docklight, which provides light comparable to an incandescent dock light with a 150W PAR38 lamp. The FLEX LED is designed for the general illumination of a truck trailer. The LEDs have an average rated life of 50,000 hours and a 12° beam angle, plus they operate on only 16W, which offers an 84 percent energy savings over a 150W incandescent dock light. The housing is made from a high-temperature polymer and is designed to resist denting, deflection, and wear. All hardware and mounting bracket are made from zinc-plated steel to resist corrosion.
