

Linear Actuators For Any Application

The linear actuator line from **Exlar** (Chanhassen, MN) has been expanded to include the new K Series Universal rod style linear actuators. According to the company, the K Series has options to mount any type of motor, permitting operators to choose the configuration best suited for a specific application. There are four performance levels:

- The KT Series, which is suited for high-load and high-cycle rate applications where maximum life is required.
- The KX Series, an optimal choice for demanding applications.
- The KM Series, which has the benefits of planetary roller screw technology over ball screws at an economical cost.
- The KA Series, which is an ideal fit for applications that position and hold a load.
