Pivot For More Flexibility

Hyde Tools (Southbridge, MA) had developed the HYDE Pivot Nozzle Wand for gas pressure washers, and is now introducing an electric version of the wand. The new product comes with four connectors and fits virtually any major brand of electric pressure washer. According to the company, the wand allows the user to step back, stay dry, and reach into every crack without contortion. A simple slide handle pivots the nozzle, which helps users reach in, over, or around obstacles and keep a 90° angle to the surface for maximum power.
