Wasp Inventory Control V6 Launched

Wasp Barcode

Technologies (Plano TX) recently launched *Wasp Inventory Control v6*. The updated inventory software features real-time visibility of stock levels, locations and inventory access, and enables SMBs to instantly update inventory. The new software comes with free, unlimited technical support and getting started training. It also gives users the ability to attach images and files to inventory records and the ability to import an unlimited number of inventory items from an external source.
