## A1000 Variable Speed Drive

The new A1000 Variable Speed Drive from **Yaskawa America Inc.** (Waukegan, IL) is compatible with interior and surface permanent magnet motors and provides up to 200 percent torque. The user-friendly configuration includes a multi-language LCD display, parameter storage, and application presets. It has DriveWizard computer software to deliver monitoring and trending functions through the A1000's standard USB port. Embedded applications functions, such as PID control, droop control, and function block programming provide system level control without the use of a stand-alone controller. All materials used in the A1000 comply with the directive for Restriction of Hazardous Substances.
