

Navigator Series Of Portable Scales

OHAUS Corporation (Pine Brook, NJ) has launched the Navigator Series of portable scales. The Navigator Series offers sensors for “touchless” operation, fast response time, and overload protection. The touch-free control of tare, zero, print, function, and display backlight helps to minimize touching the keypad, avoiding cross-contamination. The overload protection system allows the scale to withstand loads up to 400 percent of its rated capacity and the rechargeable lead acid battery enables up to 100 hours of normal use on a full charge. Multiple application modes such as counting, percent weighting, and inventory management contribute to its versatility.
