

New DeWALT Discs Last Twice As Long

DeWALT (Baltimore, MD)

presents its new wearable backing flap discs, ideal for a variety of applications, including weld blending, material removal, and welding preparation. The discs have a new wearable backing that automatically wears away at the same rate as the cloth, allowing full use of the cloth for less waste. Lasting two times longer than the XP flap discs, the new discs also offer the removal rate of a 1/4-inch grinding wheel.
