

Portable Monorail Fall Arrest System

Rigid Lifelines (Morgantown, PA) has developed a Portable Monorail Fall Arrest System that delivers fixed-path fall protection. Completely portable using a forklift or optional steerable rolling chassis package, the system provides access to many vehicle types while offering fall protection coverage up to 30° off center. Ideal for workers up to 400 lbs when used with 900 MAF energy-absorbing lanyards, this system is a bolt-together design and requires no welding for assembly. The overall typical weight of the system is 13,800 lbs and options include non-pneumatic tires and leveling jacks.
