

SCW Wash-down Curtain Wall from Zoneworks

The new SCW Wash-down Curtain Wall from **Zoneworks** (Milwaukee, WI) is a flexible fabric wall that allows users to enclose areas to minimize overspray during routine production processes. Ideal for any plants with harsh wash-down environments, the wall is constructed of 18-ounce white vinyl fabric and is manufactured without stitched seam to help eliminate the potential for bacteria accumulation. No Velcro is used to connect the curtain wall panels that combine to form a single wall. All components used to suspend the wall are made of stainless steel. The stainless steel track and two-wheel trolley system are for easy opening and closing of the sliding wall; but it can also be configured to form a stationary wall.
