

## CIMTECH 46C Metalworking Fluid

CIMTECH 46C Metalworking Fluid from **CIMCOOL** (Cincinnati, OH) has Boeing approval under BAC 5008REVr-Areas 5 and 6. CIMTECH 46C is recommended for moderate duty grinding of hard metals such as cobalt, stellite, and titanium alloys. Designed to meet the strict performance and chemical requirements of aerospace manufacturing, the metalworking fluid has exceptional foam and odor control. Depletion resistant, it reduces costs by minimizing the amount of concentrate required for makeup and contains a proprietary blend of inhibitors that protect ferrous machine tool components while minimizing dissolved cobalt in solution. It is a clear mix and rejects ramp oils, which allows for easy removal by oil-skimmers.
