

Dust Collecting Guards

Makita (La Mirada, CA) has released two new dust extraction solutions. The new Dust Collecting Guards, for use with Makita 4½ inch grinders, are ideal for a range of concrete and masonry applications including tile cutting, concrete cutting, tuck pointing, and cutting expansion joints. When used with a commercial-grade vacuum system, the new guards are engineered to provide improved dust collection on the jobsite. The new guards are part of Makita's expanding line-up of concrete solutions, including a full range of rotary, demolition and breaker hammers, concrete planers, concrete power cutters, and grinders.

To see the full range of concrete solutions, go to www.makitatools.com [1].
