

Wireless True RMS Logging System

The Wireless True RMS Clamp Meter/Data Logging System (Model CMR35) from **General Tools & Instruments** (New York, NY) improves safety while increasing utility and reducing labor costs. With its ability to remotely monitor multiple voltage/current inputs at once, the system is designed for use by industrial MRO professionals. The basic Wireless True RMS (TRMS) Clamp Meter/Data Logging System consists of a clamp meter/transmitter and a data logging receiver. Data can be downloaded from the receiver to a computer via the included USB cable and Excel-formatted data logging software. The system wirelessly facilitates the surveillance of equipment in hard-to-reach areas at a maximum unobstructed distance of 333 feet from the receiver's position.
