

10-20 HP CL Compressors

Boge (Powder Springs, GA) has expanded the CL series range with 10 and 20 horsepower models. The new models have low sound levels, maintenance friendly constructions, and a small footprint. Ideal for the small industrial user, the CL series' high performance damping and lamellar graphite casting ensure effective silencing, producing sound levels as low as 59 decibels and making it an ideal OEM choice. The compact design ensures a small footprint and is a space saving solution. All components are accessible from one point, allowing hassle-free maintenance work.

To see the CL series, visit www.boge.com/us [1].
