

Navigator Scales

OHAUS Corporation (Parsippany, NJ) has introduced two new models to the Navigator family. The new Navigator and Navigator XL models, which join the recently launched Navigator XT, offer a unique combination of features including sensors for “touchless” operation, fast response time, and overload protection. Designed to be robust, fast, and accurate, the Navigator and Navigator XL are ideal for use in light-medium duty industrial applications, including paint and ink mixing, packaging, sampling, and parts counting. Up to 400 percent safe overload enhances protection of internal components during industrial use.
