

Torque Limiting Screwdrivers

Bondhus Corporation (Monticello, MN) has released a unique line of FELO brand adjustable torque limiting screwdrivers. The desired torque level can be set at the top of handle and when the preset torque level is reached, the mechanism slips and makes an audible “click”. Three models cover a torque range from 5.3 inch pounds to 47.8 inch pounds. The handle only limits torque when rotated clockwise; full torque (no limiting) is achieved when the handle is rotated counterclockwise. A full range of Phillips, Straight, PZ, Torx, and Torx Plus tip styles are available.
